Description:

Voice UC28-35 headsets are the ideal choice for the office, remote work and learning, as well as for listening to your favorite music tracks. The lightweight, flexible design combined with soft foam covering the earcushions ensure comfortable use in all conditions. Latest solutions such as Audio button or possibility of connecting headphones via USB or JACK 3.5 mm make it extremely functional. Microphone with advanced noise reduction combined with HD sound guarantee high quality conversations regardless of the environment. The highest production standards in the European Union, excellent quality materials and robust construction ensure the highest durability of the product. The UC28-35 headset has a modern USB remote control with an Audio button, which allows user to adjust acoustic parameters optimized either for conversation or music. Moreover, the backlit remote control allows you to answer and end calls, adjust the volume and mute the microphone. The microphone is additionally equipped with a busy light which informs the surroundings about the current call. The headset works with most operating systems available on the market, and proven Plug & Play technology makes it fully ready for use immediately after connection. This model is available in both USB-A and USB-C versions, depending on the option you choose.
