QD/USB A80 UC

Axtel QD/USB A80 UC is an entry level adapter that allows swift and effortless connection of your Quick Disconnect headset to a PC supplied with a USB port.

Key features:

- Optimized for S4B,
- Volume adjustment

- Mute microphone button
- DSP

- Pickup and cancel button with MS S4B

Description:

It comes with an ergonomic pilot that gives you full control over your softphone phone calls, allowing you to adjust the volume or mute the microphone right away, so you do not need to waste any time on operating the computer settings. As it is optimized for Skype for Business, you can also pick up or decline an incoming call, as well as hang up on an ongoing one, using corresponding buttons on the pilot. The status of an ongoing conversation and switched on mute is signalised with backlighting of the analogous buttons on the pilot. The Digital Signal Processing Technology eliminates echo in the speakers to improve the quality of your business calls over a softphone. Backed by a two year standard warranty.
