

# Axtel PRIME HD Mono NC

## When Technology Meets Efficiency

Modern trends and limitless opportunities in communication have inspired us to create an outstanding Prime headsets line. The Axtel PRIME HD is designed for all the companies that value effective communication. This innovative line of headsets is compatible with IP phones. Thus, every user can take full advantage of the wideband and high quality sound found on their modern devices.

Moreover, excellent audibility and a microphone with noise cancellation enables flawless communication between both communicating sides. The flexible construction of the headset allows smooth moderation throughout the day and increases comfort while working. Given these most convenient conditions, consultants can fully focus on their daily tasks to achieve more work efficiency.
