BEST SOLUTIONS FOR HOME AND REMOTE WORKERS

The solutions by Axtel World are designed to give home workers the means to communicate effectively regardless of their working environment.

Staff working from home have the same needs as those working on company premises. They require technology solutions that are able to filter out ambient noises and allow them to fully concentrate on their communication tasks. Remote workers also need a high degree of versatility in their devices and have to be certain of full compatibility with their preferred hardware and software environments.

ABOUT US

Everything you need to know about Europe's most innovative Headsets, IP Phones and Webcams manufacturer

Axtel is a **European-based global brand** that specializes in the manufacturing of professional headsets, IP phones and webcams. We deliver communication solutions particularly geared towards call centers and office environments. Our clients' needs and expectations are the number one priority we consider during all products' design phases. We aim to create devices that support our clients in the most effective and efficient way possible.

We focus on bringing more authenticity to your business conversations through the use of advanced sound technology. Not only we follow all leading technological trends on the market, but we also strive to exceed global quality standards of communication solutions. Because our ultimate goal is to create products that add true value to a business. Sound quality, reliability and maximum comfort, all achieved through ergonomic design, are the main features of Axtel devices. Having created **an extensive product portfolio** for enterprises worldwide, Axtel has become a trusted business partner for the entirety of its client base.

5 REASONS COMPANIES OPT FOR AXTEL

EXTENSIVE EXPERIENCE

Established in 2004, throughout the years Axtel became an international vendor that provides the best communication solutions worldwide. Despite this fact, the company continues to strive for excellence in their ongoing efforts of becoming globally recognized brand as well as a leader within its industry.

EUROPEAN STANDARDS

Our products are manufactured in Europe, and we place great emphasis on closely monitoring the production process to ensure the highest possible quality. Not only does this include strict quality control at every stage of production, but we also make continuous efforts to improve our products rapidly as well as in great detail. That is why Axtel products meet the highest quality standards applicable to various international markets.

HIGH QUALITY

Our unwavering commitment to quality is vital in all that we do. We make an active effort to maintain high-quality standards throughout the design and manufacturing process. We do so in the most efficient way possible, in order to ensure our product is affordable for a vast amount of consumers and business professionals around the globe.

COLLABORATION

The collective objective of Axtel has always been to provide reliable products that fully support each user in conducting of their business affairs. That's why we are proud to be certified by, as well as compatible with, the solutions of the most well-renowned brands within the telecom industry.

OUR PARTNERSHIPS

Axtel works alongside strategic alliance partners in order to ensure that our products are easy to deploy and fully compatible with the great majority of their solutions.

CHOOSING A SOLUTION

What to consider?

1. COMPATIBILITY

Axtel works well with a very wide range of telecommunication devices and solutions. Please contact us to check whether your existing communication solutions are compatible with our products. Compatibility includes the following hardware:

Computers

Mobile Devices

Deskphones

Other Devices

2. TYPE OF ENVIRONMENT

Ambient conditions are important when selecting the type of communication solution for your organization. Proper noise cancellation, sound technology and many other technical features play an important role in the users' experience.

3. INDIVIDUAL PREFERENCES

Each business has unique needs defined by but not limited to:

- Need of cost-effective solution
- Search for robust tool dedicated to everyday use
- Frequency of conversations on the phone and softphone
- Frequently changing workspaces between office and home
- Desire of highest sound quality and clear communication
- Appreciation for comfort while working
- Preference for modern design

ELITE SERIES

Exclusive sound quality

HD voice is a crystal clear sound standard used in Elite models. Microphone with advanced noise cancellation technology can improve the quality of a conversation even in the loudest office environment.

Find out more on: www.axtelworld.com/elite

ELITE HD VOICE SERIES

The Elite HD Voice series headsets combine most advanced sound technology with an original design in one interface. The Elite HD Voice series is designed for the most demanding users and guarantees clear and flawless communication for both sides. All headsets in the Axtel Elite series provide crystal clear sound quality for excellent audibility.

The microphones are equipped with best noise cancellation making the Elite series headsets perfect for even the loudest contact center environments. Consultants and clients can fully focus on their conversation in a way that comes as close to face-to-face interaction as possible.

Furthermore, these professional headsets also offer intuitive USB connections and Plug & Play function. The exceptional construction of the Elite series headsets combines a unique design with top-quality, scratch-resistant materials that meet the needs of even the most demanding clients. They are equipped with adjustable headbands and soft, leatherette ear cushions for extra comfort. Designed with exceptional attention to detail and available in mono and duo variants, the entire product range impresses with its modern design acting as a tasteful solution in business.

PRIME SERIES

PRIME SERIES

We all know how loud open-space offices can be, so we designed a headset that delivers a completely new level of business communication. In order to improve your efficiency, the Prime series is equipped with Digital Sound Processing (DSP) and Acoustic Protection Technology that provide HD sound quality and excellent noise cancellation.

Our ergonomic solutions ensure a high level of comfort while you carry out your daily tasks. The light, flexible structure, soft and movable earpieces that adjust to the shape of your ear, smooth moderation and the functional USB remote control deliver the highest level of comfort at work. It allows users to stay focused even after many hours of continuous use. The Prime headsets are compatible with most IP phones, so users can take advantage

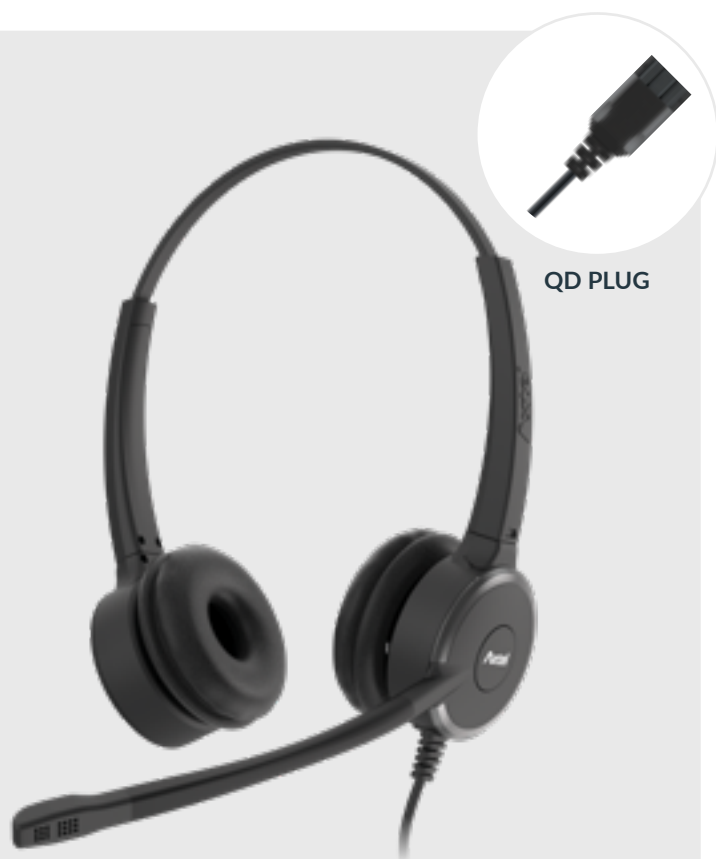

of the wideband and other high-quality sound features of their modern devices. For users who need to carry out various tasks during calls, the series also offers wireless options that allow for unrestrained communication and mobility within a range of 200 meters. These wireless headsets have a battery life of up to 10 hours without charging and offer efficient integration with computers, desk phones and mobile phones.

Ease of use is guaranteed through intuitive controls on the base station and the headset, allowing for answering and declining calls and efficient management in every situation by switching between three communication channels.

Axtel Prime is dedicated to all companies that value effective communication and is a perfect fit for all types of workplaces.

PERSONALIZATION

Create personalized Prime HD headsets

Our goal at Axtel is to connect people around the world using our products. As the products are designed with companies and their needs in mind, we would like every Axtel headset to make our clients' jobs easier.

ENGAGE WITH COLORS AND YOUR LOGO

Over the years, we've learned that seemingly subtle changes in the work environment can have a huge impact. A friendly ambience translates into greater engagement from your people, which is why Axtel encourages you to personalize our products by playing with color and adding your company logo. By changing the color of the O-ring and placing your logo, you can create a headset that visually underlines the individual character of your company.

DEVELOP AND MOTIVATE

Each color has its own strengths and a different effect on our feelings and behavior. Color can affect our motivation, the way we approach tasks, our creativity and effectiveness. Choose the color that's right for the needs of your team.

QUALITY WITHOUT COMPROMISE

Designed with the user's comfort in mind thanks to its light construction, the Prime HD headset ensures hours of easy, comfortable communication. It brings together quality and comfort, along with a personalized, modern design that lets you stand out.

PLAY WITH COLOR

As a producer of professional headsets, Axtel is aware of the great possibilities that small changes can deliver. That is why we offer 15 basic possible colors for your headset's O-ring. Furthermore there is a possibility to individually choose other colors from RAL palette. Use the creator to see what your headset will look like.

VOICE SERIES

Crystal Clear Audio in Every Environment

The Axtel VOICE is a series of professional headsets perfect for office, remote work and education as well as listening to music.

Find out more on: www.axtelworld.com/voice

VOICE SERIES

The Axtel VOICE series headsets are professional, high-quality business headsets that work even in the most challenging and loudest offices. Each model offers clear HD stereo sound quality for calls, music and multimedia in dynamic environments. The wearing comfort of Axtel VOICE ensures the productivity of staff who use the devices for an extended period of time.

The portfolio of Axtel VOICE is designed to offer a headset for every possible use case in business, with a connection type for every environment:

PROFESSIONAL HEADSETS - VOICE QD

For easy connection with various IP desk phones and other dedicated communication devices, the universal QD plug of Axtel Voice QD enables users to make use of all the advanced functionality of their desk phones.

UNIFIED COMMUNICATION - VOICE UC

Compatibility with most softphones makes Voice UC headsets easy to use and highly intuitive. They offer additional control and visual features, including busy light on the microphone - signaling ongoing calls and backlit USB pilot - in most versions with Audio button, which allows user to adjust acoustic parameters optimized either for conversation or music. Those features make them perfect for home office.

DIRECT - VOICE USB | VOICE PC

Axtel VOICE is designed for every environment, from business premises to home offices and bustling public spaces. The USB plug allows for easy connection with various devices and enables users to utilize all of the functionalities of their softphones. The JACK 3.5 mm audio plug allows for easy connection with PC's, smartphones, tablets, and enables full use of any communication application in every setting.

SENZON
IP PHONES

IP PHONES

Versatile Line of VoIP Phones

Functionality, ideal quality of sound and reliability will ensure the highest standards of communication.

Find out more on: www.axtelworld.com/phones

ABOUT AXTEL PHONES

Irrespective of technological changes, IP phones remain an essential work tool enabling faster, easier and more effective communication. Having that in mind, we decided to introduce a Professional Line of IP Phones, which with their functionality, quality of sound and reliability will ensure the highest standards of communication in every office.

Configuration is often a long and tedious process with other competing IP phones. Axtel has an optional application for provisioning to help our clients facilitate faster configurations. In fact, you can uniformly configure multiple phones automatically

with auto provision through your choice of RTP, HTTP, HTTPS and PnP on any Axtel IP phone.

Having a one-of-a-kind VoIP phone is crucial for today's busy professionals. Our phones offer two key customization features. Each Axtel IP phone has large display that is customizable for each user by using XML technology. Creating a phone display specific to our client's needs, as well as the user. The customizable user interface of the phone is enhanced with ergonomic customization capabilities. Axtel phones offer two distinct tilt degrees of the phone base.

ABOUT AXTEL WEBCAMS

Since the very beginning Axtel focuses on their customers' needs and suggestions, thus strive to create functional devices of the highest quality. At Axtel we know that body language is a major element in interpersonal communication, which can only be conveyed when you observe the other person. Furthermore uninterrupted image is crucial for effective communication

when it comes to online meetings. That is why, in order to meet market's and clients' expectations, Axtel decided to launch a professional line of webcams - advanced and modern devices designed to conduct the highest quality virtual meetings, regardless of location.

THE NEW STANDARD OF VIRTUAL/ONLINE MEETINGS

Bring your online business meetings closest to a real-life experience with the Axtel AX-FHD Webcam Pro. This new state-of-the-art webcam will maximize your company's effectiveness by allowing a superb quality of virtual meetings with the most advanced technology.

The Axtel AX-FHD Webcam Pro provides flawless image guaranteed by Full HD 1080p Video Quality alongside exceptional frame rate 60 FPS - the greatest performance on the webcam market. Moreover, it has been equipped with an extra wide angle of 105 degrees, which is especially convenient if a whiteboard is used for presentation or there are many people in the room to fit in the image. This webcam also performs superbly in far from ideal conditions. In addition, the built-in noise cancelling microphone allows you to actively participate in discussions without the need for an additional device. Supplied with numerous convenient elements, such as a privacy shutter to ensure security when the device is not currently in use and a 2-meter long USB 2.0 cable for additional comfort of use.
