## **Axtel expands portfolio with IP phones**

Based in Europe, Axtel has been specializing in professional high-quality headsets. Our dedication to sound quality, reliability, and maximum comfort has provided us with a rich portfolio and customers all over the world.

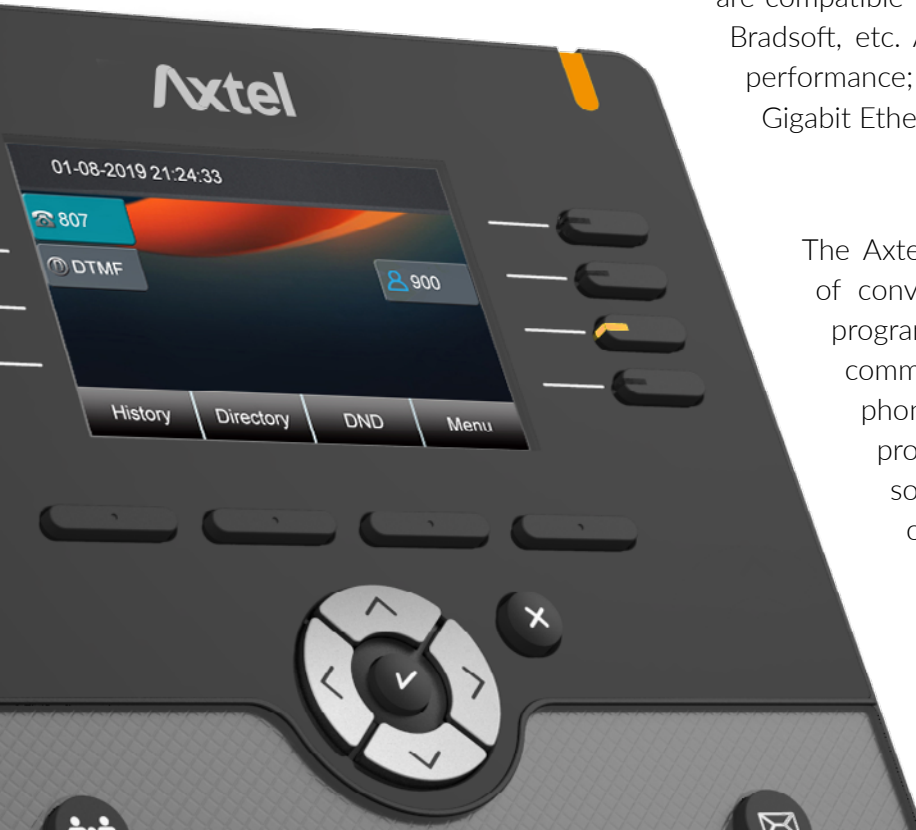

As technology continuously changes, improves, and grows to meet user demands so must the telephone industry. After much thought, deliberation, and engagement from designers and product managers, Axtel is harnessing VoIP technology to premiere an exclusive new line of intuitive IP phones.

# Our IP phones have been designed to meet the highest standards

Axtel IP phones: AX-300G, AX-400G, AX-500W were designed for businesses that demand ideal sound-quality as well as function. The 300, 400, and 500 models all offer HD audio and a dual-port Gigabit Ethernet that also powers the unit. Resilient to hours and hours of intensive use, our IP phones have been designed to meet the highest standards.

Setup is an easy and effortless process with Axtel's provisioning options to facilitate configuration for one phone or for hundreds. All of our IP phones are compatible with most platforms on the market, like 3CX, Bradsoft, etc. A speedy setup is as important as speed of performance; that is why Axtel phones prides itself with a Gigabit Ethernet.

The Axtel IP phones are made to increase the ease of conveyance between people. Axtel phones are programmable in 17 languages - to ensure the best communication between the end-user and the phone. Additionally, all of Axtel's VoIP phones provide 5-way conference calls in crystal clear sound quality. The IP phones offer two till options and many soft keys to create a bespoke phone that fit each user's needs.

# AX-300G

## Enterprise HD IP Phone - Classic Gigabit IP Phone

The user-friendly entry-level AX-300G model is the ideal choice for small-to-midsize businesses. It provides advanced noise reduction and HD audio quality for all users. The affordable AX-300G offers four SIP accounts, a 2.8" backlit display, and five-way conference calling.

# AX-400G

## Enterprise HD IP Phone - Gigabit Color IP Phone

The mid-level AX-400G is fit for mid-size companies and executive offices alike. This Gigabit IP phone offers a colorful 2.8" TFT LCD display with 320x240 pixels and excellent HD audio. This versatile VoIP phone provides flexibility for up to eight SIP accounts. The elegant design complements the AX-400G's intuitive interface.

# AX-500W

## Enterprise HD IP Phone - WiFi/Bluetooth IP Phone

Executive assistants and managers will admire the integrated WiFi and Bluetooth found in the AX-500W. The top of the line AX-500W supports 5-way conference calling, EHS integration, and an optional expansion module. The phone comes to life with a colorful 3.5" TFT LCD with a 480x320 pixel display and intuitive design comforting the most demanding users.

# Why choose Axtel?

Not everyone knows that Axtel IP Phones have superior sound quality, reliability, and comfort are our trademarks. What makes our phones different from others on the market is visible on each and every model we offer.

## Worldly

Axtel IP phones support our international clients with a choice of 17 languages to keep communication with Axtel VoIP phones on par with that of the user and receiver. Our phones offer more SIP lines for each model compared to others available on the market, a Gigabit Ethernet Port and Power over Ethernet.

## Fast

Configuration is often a long and tedious process with other competing IP phones. Axtel has an optional application for provisioning to help our clients facilitate faster configurations.

In fact, you can uniformly configure multiple phones automatically with autoprovision through your choice of RTP, HTTP, HTTPS, and PnP on any Axtel IP phone. Consider it a kind gesture that many competitors forgot to include.

# Unique

Having a one-of-a-kind VoIP phone is crucial for today's busy professionals. Our phones offer two key customization features. Each Axtel IP phone has large display that is customizable for each user by using XML technology. Creating a phone display specific to our client's needs, as well as the user. The customizable user interface of the phone is enhanced with ergonomic customization capabilities: Axtel phones offer two distinct tilt degrees of the phone base.
